SPRINGDALE HEALTH DEPARTMENT

Emergency Preparedness

As part of the Springdale Health Department public health emergency preparedness efforts, response plans have been developed and exercised. The Springdale Health Department is part of a regional public health network in southwest Ohio that partners with other local public health departments, hospitals, the Ohio Department of Health, local EMA and local first responders to plan and prepare for emergencies.

Our Mission

The Mission of the Springdale Health Department is to promote the health and safety of our community through health education and wellness, disease prevention and emergency preparedness. We seek to meet the needs of our community by serving as a strong public health advocate and by acting as a liaison between our stakeholders and our community partners.

Our Organization

The Springdale Board of Health is the policy-making body of the department and consists of five council members appointed by the Mayor and approved by the City Council. The members are appointed for staggered two year terms and meet on the second Thursday of each month in the Municipal Building. The Board appoints the Health Commissioner who, along with the staff, enforces the rules and regulations of the State of Ohio and the Board of Health and carries out programs designed to meet your needs.
