

# Infrastructure Maintenance

In addition to the [Services and Programs](#) that the Public Works Department performs, we are also responsible for ensuring the safety and usability of infrastructure within the City. This includes:

1. Road and curb maintenance and repairs
2. Bike and pedestrian facility maintenance
3. [Snow and ice control](#)
4. Gaurdrail maintenance
5. Traffic signs and signals
6. [Storm sewers](#)
7. Bus shelters
8. [Facilities and grounds maintenance](#)

The majority of the streetlights are maintained by [Duke Energy](#). Streetlights located along State Route 4 are the responsibility of the Public Works Department. Contact us via pw [at] springdale.org (email) to report an outage.
