Swimming Pool Improvements Ready For The 1998 Season

The summer of 1998 will be packed full of new attractions and features to the Community Center pool. Three goals that the staff wanted to accomplish with this project were:

1) Update and modernize the mechanical operations of the 25 year old pool. (Filters, pipes, valves, pumps, etc.)
2) Provide attractions for a wide variety of age groups.
3) Rejuvenate the interest and attendance of the pool.

We believe the improvements and new features will fulfill our goals and most certainly benefit our pool patrons. Construction began in October and should be completed by May 23, 1998.

165’ Poolsider Water Flume

The slide will have 3 turns and a shut down lane designed to slow riders down before exiting the slide. The shut down lane design will allow non-swimmers to utilize the slide and safety concerns are reduced considerably. Splash and safety guards are provided on all curves and are integral to the flume. Riders will need to meet a height requirement and will be permitted to ride one at a time only. Users will not be permitted to ride with small children in their lap or use flotation aids. A lifeguard will be located at the top of the slide in order to establish spacing between riders. This will reduce the possibility of collision between riders.

Rain Drop Water Fountain

This feature is sure to capture the attention of the youngest swimmer. Located in the existing wading pool, the colorful rain drop will fascinate children for hours. The staff will have the ability to adjust the cascading water from a rate of 50 gallons per minute up to 150 gallons per minute.

Pool Entry Steps

The construction of steps in the 2 foot area will make access to the water a bit easier for all age groups. This area will provide patrons a place to sit and watch their children and stay refreshed without being completely in the water. It will also be a perfect place to "introduce" the younger ones to the "big" pool.

Mechanical Equipment

Plans call for the replacement of the current filter tanks with 2 Horizontal Sand Filters. The new filters will be smaller in size but will have the capacity to filter the water at a much faster rate than the current ones. In addition the wading pool and slide will each have their own separate filters and chlorination systems. Automatic water treatment control systems will be installed for each of the three areas. (Main pool, slide and wading pool) The automatic controllers will monitor the water quality continuously around the clock. They will also automatically adjust rates at which chemicals are added. New PVC piping, valves, pumps and water heater are also in the plans. The mechanical equipment of a pool is critical to its successful operation. The upgrades and replacement of the existing filters, pump, heater, valves, and piping will help insure outstanding water quality and comfort to our patrons.
