For additional information about COVID-19, please contact the Springdale Health Department:
513-346-5725   health@springdale.org   www.springdale.org/health-department.aspx

To promote community health, Springdale Health recommends the following CDC based protective measures:

• Wear a Face Mask: This will protect your and other people. It can slow the spread of COVID-19.

• Practice Good Hand Hygiene: Wash your hands often. Avoid touching surfaces when possible. Avoid touching your mouth, nose, ears, and eyes. If there is no sink, use hand sanitizer.

• Maintain Social Distance: As much as possible, stay at least 6 feet away from other people.

• Self-Isolation or Self-Quarantine: Stay at home if you are sick. If you are older or have health problems that could weaken your ability to stay healthy, keep away from other people.

• Cover your Cough or Sneeze: Cough or sneeze into a tissue or, if you don’t have one, your elbow. Throw tissue away and make sure you wash your hands or use sanitizer.

• Clean and disinfect: Clean and disinfect surfaces, such as mobile phones, door handles, faucet handles, grocery carts, countertops, and keypads, to keep them free from bacteria and viruses.
